

NEW BATTERY RECONDITIONER

RENAULT
TRUCKS
DELIVER*

DESCRIPTION

- RENAULT TRUCKS has expanded its product range to extend battery operating life and is offering a battery reconditioner.
- Following cycles of battery charge and discharge or prolonged storage, a build-up of sulphate occurs, reducing the effective surface area of the electrodes and accumulator capacity.
- Operating as a regenerating device, this equipment uses an electro-chemical process to break down the crystals of lead sulphate formed during battery discharge and extends battery capacity and operating life.

SCOOP - JULY 2016
SERVICE & PARTS

ADVANTAGES

- Technical: Extends battery charge capacity by reducing and preventing the build-up of lead sulphate.
- Environmental: Extends battery life by taking effective action against ageing caused by the build-up of sulphate.
- Economical: Avoids deep discharges that reduce battery life and early replacement.
- Practical: A reconditioner suitable for the brand that fits easily into the battery compartment.
- Warranty: 1 year, parts and labour.
